

**Structure****Origin:** Trichoderma sp.**CAS Registry Number:** 16891-85-3**Appearance:** off white solid**Molecular Formula/ Weight:** C<sub>29</sub>H<sub>38</sub>O<sub>8</sub>=514.62**Purity:** >95.0% by HPLC**Solubility:** Sol. in 1mg/ml ethanol, methanol, DMSO**Background Information:**

Roridin E, macrocyclic trichothecanoids, is isolated from several fungi. It shows activity against the arenavirus Junin (JUNV).

**Handling and Storage:**

Store at -20°C.
